

Caleb Van Lue

6826 Ramblewood Dr. Apt E • Fort Wayne, IN 46835 • vanluecaleb@icloud.com • (260) 338-3440

Education

Ball State University

Bachelor of Science, Computer Science. Summa Cum Laude, 3.94

Muncie, IN

2022

Experience

Independent Technical Projects

Self-Directed Infrastructure & Development Work

Fort Wayne, IN

September 2025 - Present

- Designed, deployed, and maintained a self-hosted TrueNAS server environment supporting 24/7 media streaming, network video recording, DNS services, and automated cloud backup workflows
- Managed server administration including storage pool configuration, replication, permissions, and uptime/reliability troubleshooting, gaining hands-on experience with Docker containerization and management of distributed services
- Built and deployed personal web applications using Next.js to stay current with modern frontend and deployment practices (www.calebvanlue.com)

The Ferguson Agency

Software Engineer

Fort Wayne, IN

March 2025 - September 2025

- Built critical extensions to functionality of Ferguson's in-house software solutions using Next.js, NestJS, and GraphQL, improving user experience for multiple clients simultaneously
- Wrote data migration scripts using PostgreSQL and MongoDB to move vital client and product data between environments to simplify tedious manual processes
- Applied UTM features across Ferguson's fleet of WordPress sites, improving analytics and visibility into software usage

Sweetwater Sound

Software Engineer

Fort Wayne, IN

May 2022 - October 2024

- Shipped ~15 REST APIs in NestJS and ASP.NET powering Sweetwater's distribution operations (receiving through order fulfillment), plus mobile tools in SwiftUI and Jetpack Compose for associates to take advantage of these services at scale
- Added indexes and query optimizations across logistics relational databases and services to improve efficiency of warehouse operations
- Ran daily code reviews to regularly catch issues before reaching production and to standardize team code quality and knowledge

Skills & Interests

Technical: TypeScript/NestJS, C#/ASP.NET, PostgreSQL, React, Next.js, Docker, GCP, Linux

Soft: Ownership, technical communication, problem-solving under ambiguity, adaptability, collaboration

Interests: Music (piano, sax, and records), film & TV, nature walks, Lake Michigan, homelabbing
